

Stensrud Cabinet Company

Missoula, Montana

TPM Member Since
February 2004

Stensrud Cabinet Company was founded in 1993 by Glen Stensrud, a fourth-generation Missoula area native. Glen loved working with wood and found that the Missoula area needed a quality cabinet maker and turned his hobby into the career he has today.

At that time, the shop was small, employing only one or two people doing custom woodworking projects. With superior quality and customer service being the most important elements in the business, the reputation of the company quickly grew.

CNC Router and Edgebander Machines

Makor Q-One Finishing Machine

Kelly Stensrud worked part-time with his dad while attending The University of Montana. After graduating from school with a degree in management (and an impressive football career), Kelly joined his dad and formed a corporation with a new location, and a 10,000-square foot, state-of-the-art facility. Glen and Kelly strive to stay on the cutting edge of technology and recently have added a CNC Machining Center and a Weinig moulder to compliment the vast array of tooling resources.

Quality of craftsmanship is a core value at the Stensrud Cabinet Company. Glen and Kelly supervise all projects to assure quality and consistency. Today the company employs the two owners, five quality craftsmen, and a receptionist to meet the needs of their customers.

Stensrud Cabinet prides themselves with the trust people have placed in them and the diversity of the products they are able to produce. They specialize in cabinetry and furniture for high-end custom homes and commercial facilities. They work very closely with homeowners, contractors, architects and designers in the Missoula area. The company has produced superior quality products for many custom homes, office complexes, medical and dental facilities, educational buildings, financial institutions, golf courses and dining establishments.

Stensrud Cabinet Company has proven to produce exceptional work on many residential homes. All cabinetry is custom made and fashioned to fit the owner's needs. The company offers beautiful custom cabinetry, not only for kitchens, but also for the entire home. This includes fireplaces, wet bars, bathrooms, closets, offices, entertainment centers and much more.

University Motors - Round Reception Area

Phantom Hills Golf Club - Bar Area

Stensrud Cabinet has also worked with many commercial businesses to create cabinet projects that improve the over-all working conditions. Good layout, design and custom cabinetry can help a company work run more smoothly and efficiently.

Kitchen Cabinets Stained Cherry

Stensrud Cabinet Company joined TPM in 2004 to take advantage of the benefits provided by the TPM Trust and the 401(k) program. Glen places a high value on TPM membership and said that the education classes and the Legal and Human Resource consultations have been very helpful.

Farm House Style Maple Painted Cabinets
